REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The instant invention is directed to an unobvious improvement over Frosini et al. (U.S. Patent Number 6,398,485) (see Figure 1 and Col. 4, lines 15-62). Frosini et al. discloses a gas turbine having a nozzle support ring (23) having a through hole and a cooling pipe (17) (see Figure 1 and Col. 4, lines 26-41). Frosini et al. discloses a pin (25) for connecting the cooling pipe (17) and the nozzle support ring (23), wherein the pin (25) has an external diameter smaller than a diameter of the through hole of the nozzle support ring (23) (see Figure 1 and Col. 4, lines 26-41). The improvement comprises the combination of 1) a nozzle support ring having a through hole and a cooling pipe received in part in the through hole, wherein an easy fit heat screening device connects the cooling pipe and the nozzle support ring; 2) the cooling pipe extends in part in the tubular structure, and the nozzle support ring has a groove formed in the through hole, wherein the tubular structure has a shaped outer annular end portion received in the groove.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "comments on Statement of Reasons for allowance."
